

# How to Make your own Free KBN Luxbooks, Maxbooks and Eurobooks. It's so Easy!

All you need is 2, 3, 4 or up to 12 pieces of standard paper, and a stapler.

1. Depending on the number of pages in the finished book, you will need to start with 2, 3, 4 or up to 12 pieces of ordinary printer paper. A luxbook is made with standard U.S. letter-size paper. A maxbook is made with larger legal-size paper. And a eurobook is made with A4 European-format paper. A heavier-weight paper yields a more durable book. Everything else about making your book is completely the same. The sample shown here is a luxbook, and uses just 3 pieces of standard letter-size paper.

4. Fold the stack of printed pages in half, with the cover page on top, and suddenly your book is almost complete. All you need now is a couple of staples along the spine or center of your book, on the left.

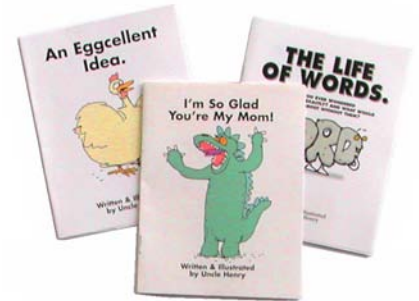

2. After you download the luxbook PDF from [read4free.net](http://read4free.net), print the all the pieces of paper on side one. If the PDF file has 6 pages, you will print pages 1-3 on three pieces of paper, as shown here.

5. Tuck the back pages gently under to allow your stapler to reach the center of the book along the fold of the spine. Then put in two staples, unfold the back pages again and there you have it. Each sheet of paper yields 4 pages of a finished book. With just 3 sheets of paper as shown here, you've just made your very own 12-page KBN luxbook!

3. Next, flip over the stack of printed pages, put it back into your printer and print out the paper again – but now you are printing the same paper on the other side. This time you will print out pages 4-6 of your downloaded luxbook PDF. Now you have printed both sides of your luxbook, on just 3 sheets of letter-size paper.

Read them, collect them, and share them with friends!
