

How to Make your own Free KBN Minibooks. It's so Easy!

All you need is 3, 4 or 5 pieces of paper,
plus a pair of scissors, some paper clips and a stapler.

1. Depending on the number of pages in the finished book you will need to start with 3, 4 or 5 pieces of ordinary printer paper. This sample minibook uses 4 pieces of paper.

2. After you download the minibook PDF from read4free.net, print the 3, 4 or 5 pages of side one.

3. Then, flip over the stack of printed pages, put it back into your printer and print out the 3, 4 or 5 pages of side two.

4. Now, with the cover page on top, first fold, then flatten out the top page of your stack of printed pages.

5. Clip the stack of pages neatly together with some paper clips. Then use your scissors to cut the whole stack in half along the easy-to-see crease you've made across the top page.

6. Now you have two separate stacks of half pages. Place the stack with the cover page on top of the other stack, remove the paper clips and make them into one stack of pages again.

7. Fold the one stack of pages in half, with the cover page on top, and suddenly your book is almost complete. All you need now is a couple of staples along the spine or center of your book, on the left.

8. Tuck the back pages gently under to allow your stapler to reach the center of the book along the fold of the spine. Then put in two staples, unfold the back pages again and there you have it! You've just made your very own minibook.

Read them, collect them, and share them with friends!
